The screenshot shows a browser window with a "Share Your Screen" interface. On the left, there's a code editor with JavaScript code for creating a LocalVideoTrack. The main area has two sections: "Local Screen" and "Remote Screen", each displaying video feeds from different participants. On the far right, the browser's developer tools Network tab is open, showing a list of network requests and their details like status, type, initiator, size, and time.

- ❖ No audio track
- ❖ Recording event:

The screenshot shows a browser interface displaying a list of webhook requests. One specific request is highlighted with a blue bar. To the right, there is a detailed view of the request's headers, query strings, and raw content.

The screenshot shows a browser window with the URL `localhost:3000/reconnection/`. The page displays a UI for managing room states and a corresponding JavaScript code snippet.

Room state is:

- Connected (highlighted in green)
- Disconnected
- Reconnecting

Create Room

After you have created the Room, please either turn off your internet network for a little while and then turn it back on, or switch between networks. The Twilio Video SDK will try to re-establish connection to the Room, which will transition to the "connecting" state. Once reconnection is complete, the Room will transition back to the "connected" state. You can join other user to the room using button below.

Join Room

Reconnection States and Events

```

use strict';

/**
 * Listen to Room reconnection events and update the UI accordingly

Network Quality

Room SID - RM882ba7b0ff23cdf4200fe9d64039e91c

Local participant level - 3
Remote participant level - 1

The screenshot shows a browser window with a video feed and a table of network quality data on the left, and a developer tools Network tab on the right.

Network Quality Data (left):

Participant	Level	Available	Actual	Latency
Local Participant	3	100%	100%	~1ms
Remote Participant	1	100%	100%	~10ms

Network Tab (right):

The Network tab shows a list of network requests from the browser to the Twilio servers. The table includes columns for Name, Status, Type, Initiator, Size, and Waterfall.
